

OUR CLOUD SOLUTIONS

Why should you choose us?

Arc Systems' Microsoft Gold cloud solution partner status underlines our expert knowledge and endorses our ability to deploy business-grade cloud solutions. We can host your systems in our private cloud, provide a hybrid solution with private & Office 365 or even deploy within the Microsoft Azure public cloud. Our close relationships with vendors mean we're well-positioned to support our clients in implementing cloud solutions.

Independent Advice

Our team of experts are highly trained to give you practical, useful advice that will help you best utilise cloud technologies. Private, public or hybrid? We don't squeeze you into a box to suit us, we ensure that a move to the cloud is focused on how you work and what you need as a business. We're vendor-neutral, and have your best interests at heart, meaning you can be sure we'll work towards creating the best solution to support your long-term business goals.

Cloud Systems

The "cloud" has been here longer than most think, just without the fashionable name! At Arc, we have a great pedigree behind us and the services to take you forward.

Hosted Desktop (DaaS)

Microsoft 365 & Office 365

Private Cloud

Public Cloud

HOSTED DESKTOP (DAAS)

Full desktop replacement for a consistent working experience from any location. Highly available and resilient systems with centralised security. Our Hosted Desktop services can encompass all user IT costs into one easy to budget per user, per month expense. Depending on your requirements we have the facilities to host your infrastructure in our bespoke Tier 2 datacentre within Azure or a hybrid of both solutions to meet your business requirements.

MICROSOFT 365 & OFFICE 365

Microsoft 365 and Office 365 solutions provide the latest in Office 365 products, Windows 10 integration and Security. With a wide range of solutions, Arc Systems can assist with procurement, migrations and configuration of all 365 solutions. As a Microsoft Cloud Service Provider we have the experience and knowledge to assist with migrations, deployments or to simply supply licences.

PRIVATE CLOUD

Our dedicated datacentre allows Arc Systems to provide bespoke solutions to our customers at competitive rates. Dedicated VPS servers inclusive of backup, firewall and support can be built to host custom applications or systems that require high availability and fast access. From Windows to Linux platforms we can tailor a solution to exactly what you need with the flexibility and scalability to easily expand the solution.

PUBLIC CLOUD

Achieve your goals with the freedom and flexibility to build, manage and deploy your apps anywhere. The Microsoft Azure, Public Cloud can be used for single server, hybrid or full infrastructure deployments with flexible resource usage based on your business needs. As a Microsoft Gold Partner and our team of expert engineers here at Arc Systems can help build, design and support systems in Microsoft Azure.
