

# CYBER SECURITY SOLUTIONS

## Why is **Cyber Security** so important?

At Arc, we understand that not every business has the time, resource or technical ability to keep up with the latest cyber threats. Our range of solutions provide proactive protection of your business covering all the key security aspects. Whether it be Cyber Essentials, Firewall Security at the perimeter, Endpoint Protection or Email Security we can provide the right advise for your business.

Our approach to offering the correct security solutions has always been delivered via thorough research of the security vendors and products to ensure clients get the best protection at cost-effective rates.

We partner with some of the leading security vendors in the business. We are the largest Sophos Managed Security Provider in the United Kingdom and as a Mimecast Managed Security Provider, we have one of the best email security and archiving solutions available.

Our Security Review service allows us to provide you with all our knowledge and experience and help protect your business from cyber threats using a combination of processes and solutions.

## Security Solutions

An effective Cyber Security plan requires the knowledge, expertise and best-fit solutions to protect your business. With over 28 years of experience in the industry Arc Systems are expertly qualified to help you combat modern cyber threats.

**Managed Firewall**

**Email Security**

**Endpoint Protection**

**Mobile Devices**

**Security Review**

## MANAGED FIREWALL

Arc System's fully managed firewall solution provides a complete Next-Gen firewall service for a simple monthly fee. In partnership with Sophos, our service includes the latest technologies to protect your business from cyber threats including anti-virus scanning, intrusion prevention, synchronised security and more. The service is fully managed by our teams of certified engineers to ensure your systems are updated and protected around the clock.

## EMAIL SECURITY

Analyse and block threats before they reach your users. In partnership with Mimecast our Managed Email Security solutions provide the protection to combat the latest cyber threats. All services include basic anti-virus, spam prevention but with the added feature of "Targeted Threat Protection" which combats ransomware, impersonation and attachments attacks with advanced methods to block the threat at source.

## ENDPOINT PROTECTION

Sophos Endpoint Protection is the latest in anti-virus, ransomware and endpoint security solutions. With the Intercept-X range of products we are now able to protect your devices from the latest cyber threats including key anti-ransomware protection to stop the attacks at source and protect your business systems and data. the Sophos suite is also able to provide services for Mobile Device Management, Device Encryption and Web Filtering.

## MOBILE DEVICES

Our mobile device management allows businesses to manage their business mobile and tablet devices to ensure they are controlled and managed centrally. This allows businesses to protect and manage their data on devices such as emails and protect these devices from accidental loss or theft by means of remote wipe or encryption. We can create policies to ensure the security of these devices are standardized across the board.

## SECURITY REVIEW

Our Security Review service provides businesses with a deep dive into the security of IT systems / Infrastructure. The review starts from the ground up checking over all the basic security and policies in place. If you simply want to ensure your network is protected our Standard Review will run through all the base checks along with monthly external vulnerability scanning. For those that have a requirement to meet the Cyber Essentials standard certificate, our Advanced and Advanced Plus services guarantee a pass to obtain the Cyber Essential certificate.
